I really wanted to make this work so bad. I focused so hard on the good side of this game but there's too much downsides for me to actually recommend it. I waited for so long to finally play this game and it breaks my heart that my first not recommended review is for game that sat on the #1 spot of my wishlist for almost a year. The moment I launched the game, I knew already that they downgraded the quality of this game. Just by basing on the quality of the main menu it looked so poor. but hey, don't judge the game by its cover right? For the first 10 minutes of gameplay, I was still impressed by the realistic graphics and textures of the game. It's really nice but it wasn't enough for me to recommend this game. What really annoys me the most was the color filter as if it was taken from Windows Movie Maker. It made the game look cheap. The hospital scene was so dark that I think they purposely did it to hide the lacked details. The story is okay, good twist but not really something new. Also, no objective list and no save function. I finished the game for almost just an hour and that is just too short imo. This game had so, so, much potential I just hope that they gave it more love and attention because it felt rushed and forced. The game already had a good following after the hype a few years ago, I just hope the devs used that advantage, took good care of this game and made it successful.. Had high hopes after seeing the teaser and playing the demo. Was waiting months just for a release date, but after the release, I waited for a while because it's store page was flooded with negative reviews. Eventually decided to pick it up on sale, but honestly, it's not even worth the 6 Euros. Don't even bother.. Great psychological thriller! Not short at all. 2 hours is just decent time. Wonderful experience.. I was really hyped for this game and bought it right as it came out but, unfortunately after playing for about 20 minutes I refunded it. The story is confusing, theres no save function, and from what I heard it's pretty short. It's not worth the 12\$ and certainly not worth the 15 after the sale ends. This is more of a 5\$ game for what you get. On the flip side I do have to give it props for the graphics, and I think thats what intially drew people in.. This game straight out sucked.
